Individual Essences

A wonderful range of single Flower Essences

Flower Essences are amazingly simple and effective tools that can help expand consciousness and promote inspiration for transformation on all levels. Each flower carries a unique energetic patterning and vibration that can not only be felt by those sensitive to subtle energies but also recognised in the shape, colouring and nature of the plant it grows on. When flowers are made into essences this unique patterning is transferred into water, which can then be easily absorbed by the bodies subtle energy system and used to promote greater harmony, balance & wholeness.
