### A wonderful range of single Gem & Crystal Essences

The mineral kingdom, like all kingdoms of life on our planet, carries consciousness and contributes its unique gifts to the development of the Divine Plan for Earth. Over the ages the energies of minerals, which include crystals and gemstones, have been used in almost every ancient civilization on Earth as tools for transformation and the expansion of consciousness. One very common and effective way of using the energies of specific crystals and gems for transformation is to make them into essences. In this process the energetic patterning of a gem or crystal is transferred into water, which can then be easily absorbed by the bodies subtle energy systems.
